

Petra Joy

PRESENTS

HER PORN

*A Compilation of the
Best Erotic Short Films by Women*

There is not just one kind of porn for women - porn by and for women has many different facets. Even though many female porn directors have been shooting their creative porn films for years, many of these films have never before been available in Europe.

Accomplished filmmaker and female porn expert **Petra Joy** therefore chose to publish a compilation of the best female-made porn of the last decade: **"I created this compilation as an homage to the best female pornographers of the last decade. It is also important to me to educate the viewers and offer them a delicatessen of erotic female-made films! I want to show the audience that they have a choice of styles when it comes to 'her porn'. There**

are many different artistic styles and a big variety of sexual preferences featured in the films and HER PORN offers something for every woman."

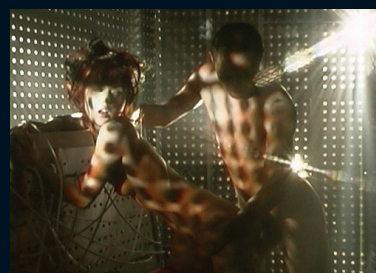

HER PORN features 14 short films from seven female filmmakers who create a new kind of porn that puts women and their desires first: From sensual film classics by accomplished director Candida Royalle, to the sci-fi sex film of the innovative artist Shu Lea Cheang and the stylish 'porn noir' of the Lesbian fetish film director Maria Beatty - this compilation is a colourful kaleidoscope of female pleasure and desires. To satisfy female voyeurism when it comes to men the compilation also includes a bonus feature called **"the forbidden fruit"** by gay male director Horst Braun. Petra explains: **"A lot of women watch gay porn because it features attractive men and men having sex with each other. Whereas in mainstream porn girl-girl is the norm, we never see guy-guy, even though a lot of women find it hot. Without this kind of scene the compilation would not have been complete"**.

HER PORN is not just a film compilation but it offers the viewers very valuable special features on a second disc. This second DVD features: Petra's porn parodies, an in-depth interview with Petra about the compilation as well as interviews with all the filmmakers. Petra points out why these interviews are crucial to a female audience:

"Male porn viewers admire the female porn stars, female porn viewers admire the female directors and want to know who these women are and what do they want? Women enjoy porn more if they can relate to the director and her vision of sexuality."

HER PORN is a unique DVD that caters for the ever growing interest in female-made porn and female porn directors. It is the first of its kind and will inspire sex shop owners and customers alike.
